

D3.3 Methodology for cultural adaptation of national CAN-MDS Toolkits

Coordinated Response to CAN via MDS

The current document was prepared on the basis of Annex I "Project Description and Implementation of the Project JUST/2012/DAP/AG/3250 (2011-2012)" submitted and approved under the Priority "Rights of Victims (RoV)" of the DAPHNE III Programme of the European Union

Partnership and Any stakeholder interested to develop CAN-MDS

Project's Information

Project's Title	Coordinated Response to Child Abuse & Neglect (CAN) via Minimum Data Set (MDS)
Grant agreement No.	JUST/2012/DAP/AG/3250
Funding	With the financial support of the EU DAPHNE III Programme
Duration	28 months
Project's website	www.can-mds.eu

Deliverable's Information

Workstream	Workstream 3 Creating Synergies – Building of national CAN-MDS Core Groups of Operators
Activity	Activity 4: Translation of CAN-MDS Toolkit in partners' official languages (Bulgarian, Belgian, German, Greek, French, Italian and Romanian)
Deliverable No.	Deliverable D3.3
Drafted	A. Ntinapogias, Project Coordinator with the contribution of Project's Partners
Deliverable title	Methodology for cultural adaptation of national CAN-MDS Toolkits
Target group	Partners and any stakeholder interested in developing a CAN-MDS

This Guide is part of the CAN-MDS Toolkit prepared in the context of DAPHNE III Programme "Coordinated Response to Child Abuse & Neglect (CAN) via Minimum Data Set (MDS)"

Coordinating Organization:

Institute of Child Health, Department of Mental Health and Social Welfare - GREECE

George Nikolaidis, Project Leader Athanasios Ntinapogias, Project Coordinator/Principal Investigator Antonia Tsirigoti, Researcher

Eleni Mihalopoulou, Project Assistant

Partners' Organizations:

Coördinatiecel Internationaal Kind en Gezin - Kind en Gezin Academie - BELGIUM

Aneliese Hendrix, Local Coordinator Bert Van Poyenbroeck, Researcher

South West University "Neofit Rilski", Faculty of Public Health and Sport - BULGARIA

Vaska Stancheva-Popkostadinova, Local Coordinator Stefka Chincheva and Elina Popova, Researchers

University Ulm, Department of Child and Adolescent Psychiatry/Psychotherapy - GERMANY

Lutz Goldbeck, Local Coordinator Andreas Witt, Researcher

Observatoire national de l'enfance en danger (ONED) - FRANCE

Gilles Séraphin, Local Coordinator Flora Bolter, Researcher

Istituto degli Innocenti – ITALY

Donata Bianchi, Local Coordinator

Silvia Mammini, Silvia Notaro, Ayana Fabris, Cristina Mattiuzzo and Lucia Fagnini, Researchers

Babes-Bolyai University, Department of Sociology and Social Work – ROMANIA

Maria Roth, Local Coordinator Imola Antal & Gabriela Tonk, Researchers

Associate Partner

Lucerne University of Applied Sciences & Arts, School of Social Work – SWITZERLAND

Andreas Jud, Local Coordinator

Expert on Ethical Issues

Paul Durning

Project External Evaluator

National Adaptation of CAN-MDS Toolkit

why needed

The CAN-MDS promotes the usage of a standard set of variables in order to collect comprehensive, comparable and reliable data among stakeholders deriving from different sectors within and among countries.

On the other hand, however, there are given differences among countries that should be handled in order for the CAN-MDS to be feasible to be applied in practice.

First, it is not possible for the system to operate in a single language; this makes translation of the whole toolkit imperative.

In addition, there are data elements such as agencies and operators to be involved that should be developed on the basis of the reality of each country.

Next, country profile reports showed differences in terms of already available infrastructures, practices, policies and legislation in regards to CAN cases administration; adaptation taking into account such country specifics should be made in order for the data elements to target valid and reliable data collection.

Lastly, content validity of the definitions of data element should be ensured for each individual data element, without however to modify the structure of the MDS. Instructions and definitions should be appropriate for all target groups (i.e. CAN-MDS operators with different professional backgrounds and responsibilities in the route of CAN cases administration), in order useful data to be collected and the collected data to be useful for all stakeholders.

which parts should be adapted in which way

Operator's Manual, e- application and Data collection protocol are the main components of CAN-MDS Toolkit. Supportive material for the Toolkit includes the eligibility criteria for Sectors and Operators and methodology for identifying the eligible data sources, the capacity building package (training module, training material, Trainer's Guide and evaluation methodology and tools) and the country profile reports, including up-to-date information for CAN related aspects (such as available infrastructures, legislation and ethics) at a national level.

From the above mentioned material methodology for national adaptation targets in CAN-MDS Toolkit, namely the Operator's Manual, e-application and Data collection protocol. Adaptation includes translation from EN to national official languages, development of content on the basis of national data, addition of country specific information and references and cultural adaptation of content on the basis of focus group discussions.

Tables 1 and 2 below suggests detailed adaptation to be used for each individual part of the toolkit

how to adapt the CAN-MDS Toolkit into National version

Translation

World Health Organization in its document entitled *Process of translation and adaptation of instruments*¹ mentions that "the aim of this process is to achieve different language versions of the English instrument that are conceptually equivalent in each of the target countries/cultures. That is, the instrument should be equally

¹ World Health Organization. Process of translation and adaptation of instruments Available at: http://www.who.int/substance_abuse/research_tools/translation/en/

natural and acceptable and should practically perform in the same way. The focus is on cross-cultural and conceptual, rather than on linguistic/literal equivalence. A well-established method to achieve this goal is to use forward-translations and back-translations".

It is noted that in the context of the project only forward translation is provisioned (in terms of financial resources); it is suggested, however, that small samples of the material to be back-translated in order to be ensured the conceptual equivalent of the national version of the toolkit to English toolkit.

As for the forward translation, the recommendations that included in the above mentioned document are valid also for the case of CAN-MDS Toolkit. In this case the translator should preferably be a professional familiar with terminology of the area of child maltreatment and epidemiological surveillance; s/he should be knowledgeable of the English-speaking culture but his/her mother tongue should be the primary language of the target culture. National coordinator in each country should provide the translator with instructions in regards to the approach to translate such as to emphasize conceptual rather than literal translations, as well as the need to use natural and acceptable language for the CAN-MDS groups of operators, which are in fact heterogeneous.

World Health Organization suggests that the following general guidelines should be considered in this process:

- Translators should always aim at the conceptual equivalent of a word or phrase, not a word-for-word translation, i.e. not a literal translation. They should consider the definition of the original term and attempt to translate it in the most relevant way.
- Translators should strive to be simple, clear and concise in formulating a question. Fewer words are better. Long sentences with many clauses should be avoided.
- The target language should aim for the most common audience. Translators should avoid addressing professional audiences such as those in medicine or any other professional group. They should consider the typical respondent for the instrument being translated and what the respondent will understand when s/he hears the question.
- Translators should avoid the use of any jargon. For example, they should not use:
 - o technical terms that cannot be understood clearly; and
 - o colloquialism, idioms or vernacular terms that cannot be understood by common people in everyday life.
- Translators should consider issues of gender and age applicability and avoid any terms that might be considered offensive to the target population.

family friend	translation	
family members	translation	
family	translation+adaptation (if needed)	modify definition (if needed) - define according to national law
fattening	translation	
female genital mutilation	translation+reference to respective law (if applicable)	
female	translation	
flogging	translation	
focus of referral	translation	
follow-up	translation+additional information (if applicable)	description, if specific procedures are provisioned

term	Suggested adaptation (translation/ modification/ addition of information and/or reference) Supporting working files and reports (where applicable)	modification of definition (if needed) and/or additional national information (if applicable) and/or secondary data (where applicable)
forced circumcision	translation	
forced feeding	translation	
forced marriage and early marriage	translation+additional information (if applicable) and reference to respective law (if applicable)	mention legal marriage age
forced sterilization	translation	
forcing child to beg	translation	
forcing child to exposed in pornography	translation	
forcing child to get married	translation	
forcing child to involve in pornography	translation+reference to respective law (if applicable)	
forcing child to participate in a violent political event	translation+adaptation (if needed)	modify definition (if needed)
forcing child to participate in religious ritual	translation+adaptation (if needed)	modify definition (if needed)
forcing child to undertake adult's responsibilities	translation	
forcing child to undertake criminal behaviour	translation	
forcing child to witness sexual violence against mother	translation+reference to respective law (if applicable)	
forcing of child to prostitution	translation+reference to respective law (if applicable)	
forcing to ingest spicy food	translation	
forms of maltreatment	translation	
foster care	translation+reference to respective law (if applicable)	
foster family	translation	
foster parent	translation	
friend's family	translation	
full access	translation	
full view access (level 1)	translation+adaptation (if needed)	modify definition (if needed)
gender	translation	

term	Suggested adaptation (translation/ modification/ addition of information and/or reference) Supporting working files and reports (where applicable)	modification of definition (if needed) and/or additional national information (if applicable) and/or secondary data (where applicable)
grabbing	translation	
grandparent(s)	translation	
has not attended school at all	translation+adaptation (if needed) - see also working file 4	modify definition (if needed)
health care organization	translation+additional information (if applicable)	provide examples of health organizations
health related professions	translation	
health services personnel	translation+additional information (if applicable) and reference to respective law (if applicable) and secondary data-working file 10	indicate if mandatory reporting Secondary data [working file 10] whehter the source of information is mandated to report CAN or not
health services	translation	
helpline personnel	translation+adaptation (if needed) and additional information (if applicable) and secondary data (see working file 10)	modify definition (if needed) - indicate if mandatory reporting Secondary data [working file 10] whehter the source of information is mandated to report CAN or not
helpline	translation+additional information (if applicable)	provide examples of well-known national helplines
hitting on head	translation	
hitting on the soles of the feet	translation	
hitting with an object	translation	
home	translation	
hospitalization of child in mother/child shelter	translation+additional information (if applicable)	provide examples of well-known child-mother shelters
humiliation	translation	
ICT	translation	
ID (identification)	translation	
identified incident	translation+additional information (if applicable)	if specific procedures of routine screening are provisioned
ignoring	translation	
illegal transfers of custody	translation+adaptation (if needed) and reference to respective law (if applicable)	modify definition (if needed)

term	Suggested adaptation (translation/ modification/ addition of information and/or reference) Supporting working files and reports (where applicable)	modification of definition (if needed) and/or additional national information (if applicable) and/or secondary data (where applicable)
immediate intervention	translation+additional information (if applicable)	if specific internentions are provisioned other than the ones mentioned below
imposing of death sentence	translation+reference to respective law (if applicable)	
inadequate or inappropriate clothing	translation	
inadequate or inappropriate nutrition	translation	
inadequate or inappropriate personal hygiene	translation	
inadequate or inappropriate shelter	translation	
inadequate supervision	translation	
inappropriately advanced expectations	translation	
incident ID	translation	
incident of child maltreatment	translation	
incident	translation	
inflicting scars/scarring	translation	
initiation of court measures	translation+adaptation (if needed) and additional information (if	modify definition (if needed) - if specific procedures are
	applicable) and reference to respective law (if applicable)	provisioned
initiation of forensic evaluation	translation+additional information (if applicable) and reference to respective law (if applicable)	if specific procedures are provisioned
institutional and system violations of child rights	translation+additional information (if applicable) and reference to respective law (if applicable)	age that children are subjected to detention penalties
institutional response	translation+additional information (if applicable)	mention the time period normally required for a service to be provided
intentional poisoning	translation	
intersex or intermediate	translation+adaptation (if needed)	modify definition, if needed (e.g. the case that this code is not applicable)
intimate partner violence (IPV)	translation+reference to respective law (if applicable)	
irregular school attendance	translation+additional information (if applicable) and reference to respective law (if applicable) (see also working file 4)	according to what provisioned by the education-related laws
isolation	translation	
justice-related professions	translation+adaptation (if needed)	modify definition (if needed)
kicking	translation	

term	Suggested adaptation (translation/ modification/ addition of information and/or reference)	modification of definition (if needed) and/or additional national information (if applicable) and/or
	Supporting working files and reports (where applicable)	secondary data (where applicable)
kindergarden	translation+adaptation (if needed)	modify definition - if different for your country
kinship care	translation+reference to respective law (if applicable)	
labour/economic exploitation	translation+additional information (if applicable) and reference to respective law (if applicable)	legal age for entering into labour market (salaried work)
lack of supervision	translation	
law enforcement related professions	translation+adaptation (if needed)	modify definition, if needed (e.g. in Italy there also i carabineri)
law enforcement services	translation+adaptation (if needed)	modify definition (if needed)
law enformcement	translation	
learning difficulty	translation+note "for informational reasons only"	
leisure	translation	
level of access	translation (and for more information, see D3.2)	
limited access (level 2)	translation (and for more information, see D3.2)	
limited access (level 3)	translation (and for more information, see D3.2)	
location of incident	translation	
locking up	translation	
majority	translation	
male	translation	
mandatory vaccination	translation (see also working file 3)	
medical neglect	translation	
mental health exam(s)	translation+additional information (if applicable)	if specific mental health exams are provisioned
mental health professions	translation	
mental health service	translation+additional information (if applicable)	provide examples of well-known mental health services
mental health services personnel	translation+additional information (if applicable) and reference to respective law (if applicable) and secondary data-working file 10	indicate if mandatory reporting Secondary data [working file 10] whehter the source of information is mandated to report CAN or not
minimum data set (MDS)	translation	
Munchausen Syndrome by Proxy	translation+note "for informational reasons only"	

term	Suggested adaptation (translation/ modification/ addition of information and/or reference) Supporting working files and reports (where applicable)	modification of definition (if needed) and/or additional national information (if applicable) and/or secondary data (where applicable)
national CAN-MDS administrator	translation+additional information (if applicable) + secondary data - working file 8)	[Name-to be completed] Secondary data [working file 8] Legal status of the administrator's agency]; and [Field where the administrator's agency belongs]; contact details: telephone number(s): [to be completed]; email(s): [to be completed]
national ombudsman	translation+additional information (if applicable) and reference to respective law (if applicable); see also working file 5	if applicable (also for deputy obmudsman for children's rights)
NGO	translation+additional information (if applicable)	provide examples of well-known NGOs
NGOs/association personnel	translation+adaptation (if needed) and secondary data (working file 10)	modify definition (if needed) Secondary data [working file 10] whehter the source of information is mandated to report CAN or not
non compulsory school	translation+adaptation (if needed) - see also working file 4	modify definition (if needed)
noncustodial parent	translation	
non-family abduction	translation	
ombudsman personnel	translation+adaptation (if needed) and secondary data (working file 10) and see also working file 5	modify definition if needed (and if applicable) Secondary data [working file 10] whehter the source of information is mandated to report CAN or not
omission	translation	
omissions	translation	
online sexual stalking and harassment	translation	
operator	translation	
operator's ID	translation (and secondary data-see working file 8) (see also working file 2)	Secondary data (working file 11) [Operator's Name]; [profession]; [Phone_Number]; [Email_Address]
ordinary/juvenile court and related services personnel	translation+adaptation (if needed) and secondary data (working file 10)	modify definition (if needed) Secondary data [working file 10] whehter the source of information is mandated to report CAN or not
other not-related household member	translation	

term	Suggested adaptation (translation/ modification/ addition of information and/or reference) Supporting working files and reports (where applicable)	modification of definition (if needed) and/or additional national information (if applicable) and/or secondary data (where applicable)
other relative(s)	translation	
other relevant professionals	translation+adaptation (if needed)	modify definition (if needed)
other specified feeding or eating disorders	translation+note "for informational reasons only"	
other substance misuse by the child	translation+note "for informational reasons only"	
out of home placement	translation+reference to respective law (if applicable)	
overprotection	translation	
parent(s)' partner(s)	translation	
parent	translation	
persistent failure to register the child at the school	translation (see also working file 4)	
persistent ignoring of the child's emotional needs	translation	
personnel	translation	
physical bullying	translation	
physical medical exam(s)	translation	
physical neglect	translation	
physical violence acts	translation+reference to respective law (if applicable)	
pica	translation+note "for informational reasons only"	
pinching	translation	
planning of intervention	translation+additional information (if applicable)	if specific procedures are provisioned
playground	translation	
police emergency protection procedures	translation+adaptation (if needed) and additional information (if applicable)	modify definition (if needed) and add information if specific procedures are provisioned
police intervention (immediate interventions)	translation+adaptation (if needed) and additional information (if applicable)	modify definition (if needed) and add information if specific procedures are provisioned
police or other law enforcement services personnel	translation+adaptation (if needed) and secondary data (working file 10)	modify definition (if needed) Secondary data [working file 10) whehter the source of information is mandated to report CAN or not
police	translation	

term	Suggested adaptation (translation/ modification/ addition of information and/or reference)	modification of definition (if needed) and/or additional national information (if applicable) and/or	
	Supporting working files and reports (where applicable)	secondary data (where applicable)	
preschool	translation+additional information (if applicable)	if needed according to country specifics	
primary caregiver	translation		
primary caregiver's date of birth	translation		
primary caregiver's relationship to child	translation		
primary caregiver's sex	translation+adaptation (if needed)	modify definition (if needed)	
primary health care services	translation+additional information (if applicable)	provide example of primary health care services	
private schools/institutions	translation+additional information (if applicable)	provide well-known examples	
professional licence/certification	translation+additional information (if applicable)	provide examples of professions requiring license/ certification	
providing child with sexually explicit material	translation		
pseudonymization	translation (see also ISO/TS 25237:2008. Health informatics – Pseudonymization)		
psychological violence acts	translation		
psychologically "unavailable" caregivers	translation		
public place	translation		
public schools/institutions	translation+additional information (if applicable)	provide examples of public schools/ institutions	
public transportation mean	translation+adaptation (if needed)	modify definition (if needed) according to what is applicable in your country	
pulling hair	translation		
pushing	translation		
recommended vaccination	translation+adaptation (if needed) - see also working file 3	modify definition (if needed) according to what is applicable in your country	
re-composed family	translation		
recreational area	translation+additional information (if applicable)	provide examples of well-known recreational areas	
recreational or leisure area or a playground	translation		
referral of child to child protection /welfare services	translation		
referral to service	translation		

term	Suggested adaptation (translation/ modification/ addition of information and/or reference) Supporting working files and reports (where applicable)	modification of definition (if needed) and/or additional national information (if applicable) and/or secondary data (where applicable)
referral	translation+additional information (if applicable) and reference to respective law (if applicable)	provisions related to mandatory reporting of CAN (e.g. for specific professional groups, public officials and the general public) (working file 10)
refusal of child's custody	translation	
refusal or failure to provide preventive health care	translation+adaptation (if needed)	modify definition if needed (if, for example, it is permitted to caregivers to not provide specific health care due to religious or cultural reasons)
refusal to allow /provide needed medical care for diagnosed health condition/ impairment	translation+adaptation (if needed)	modify definition if needed (if, for example, it is permitted to caregivers to not provide specific health care due to religious or cultural reasons)
refusal to allow needed attention to special educational needs	translation	
refusal to attend special educational needs	translation	
refusal to provide needed attention to special educational needs	translation	
rejection	translation	
relation by law	translation+adaptation (if needed)	modify definition (if needed)
relative's family	translation	
removal of parent(s)' rights	translation+additional information (if applicable) and reference to respective law (if applicable)	provisions for removal of parental rights
residential care institution	translation+additional information (if applicable) and reference to respective law (if applicable)	provide examples of well-known residential care institutions
restraining in cloth sacks	translation	
retribution violence	translation	
right of blood	translation+adaptation (if needed)	modify definition /provide information of whether this is applicable in your country
right of the soil	translation+adaptation (if needed)	modify definition /provide information of whether this is applicable in your country
routine screening	translation+additional information (if applicable) and reference to respective law (if applicable)	if specific routine screening is applied
rumination disorder	translation+note "for informational reasons only"	

term	Suggested adaptation (translation/ modification/ addition of information and/or reference) Supporting working files and reports (where applicable)	modification of definition (if needed) and/or additional national information (if applicable) and/or secondary data (where applicable)	
runaway	translation+adaptation (if needed)	modify definition according to what is applicable in your country (e.g. after how many hours a child is considered that runaway)	
sale child for sexual purposes	translation+reference to respective law (if applicable)		
scalding	translation		
school/kindergarten/preschool personnel	translation+adaptation (if needed) and secondary data (working file 10)	modify definition if needed, according to what is applicable in your country Secondary data [working file 10] whehter the source of information is mandated to report CAN or not	
school	translation		
scratching	translation		
screening tool	translation+additional information (if applicable)	if specific screening tool is applied please mention AND annex	
secondary health care services	translation+additional information (if applicable)	provide example of secondary health care services	
sectors related to CAN	translation+adaptation (if needed)	modify definition (if needed)	
self-harm actions	translation		
self-inflicted injuries	translation		
service's response	translation+additional information (if applicable)	describe standards (set by the organization itself) for service provision in terms of quantity [: for example, the number of councelling sessions or medical interventions than needed] and timeliness [: within the normal time for the provision of the specific service by the specific agency];	
services for people with disabilities	translation+additional information (if applicable)	provide example of services for people with disabilities	
sex	translation		
sexual exploitation acts	translation		
sexual harassment	translation		
sexual luring via ICT	translation		

term	Suggested adaptation (translation/ modification/ addition of information and/or reference) Supporting working files and reports (where applicable)	modification of definition (if needed) and/or additional national information (if applicable) and/or secondary data (where applicable)
sexual slavery	translation	
sexual violence acts	translation	
sexually explicit material	translation	
shaking baby syndrom	translation+note "for informational reasons only"	
shaking	translation	
shooting	translation	
showing genitals to child	translation	
sibling(s)	translation	
slapping	translation	
smacking	translation	
social bullying	translation	
social services	translation+adaptation (if needed) and reference to respective law (if applicable)	modify definition/ adapt the description of what is applicable in your country (e.g. if CPS are in place)
social welfare (public) system personnel	translation+adaptation (if needed) and secondary data (working file 10)	modify definition (if needed) Secondary data [working file 10] whehter the source of information is mandated to report CAN or not
source of information	translation	
spanking	translation	
specific incident of child maltreatment	translation	
sports-athletics	translation	
stabbing	translation	
staying in uncomfortable positions	translation	
step parent	translation	
stoning	translation	
substance	translation+adaptation (if needed) and reference to respective law (if applicable)	modify definition/ adapt content if needed (legal/ illegal substances) according to country specifics
substance use/abuse by the child	translation+reference to respective law (if applicable)	

term	Suggested adaptation (translation/ modification/ addition of information and/or reference)	modification of definition (if needed) and/or additional national information (if applicable) and/or	
substance use/abuse	Supporting working files and reports (where applicable) translation	secondary data (where applicable)	
substanstiation status of maltreatment	translation+additional information (if applicable)	if specific procedures/ classification of substantiation is applied in your country	
suicidal thoughts	translation		
suicide attempt(s)	translation		
supportive intervention for current caregivers	translation+additional information (if applicable)	if specific supportive interventions are provisioned	
suspected maltreatment	translation		
terrorization	translation		
tertiary health care services	translation+additional information (if applicable)	provide example of tertiary health care services	
threatened sexual abuse	translation		
threatening with a knife or with a gun	translation		
threats of maltreatment	translation		
throwing	translation		
torture	translation+reference to respective law (if applicable)		
touching genitals	translation		
trafficking	translation+reference to respective law (if applicable)		
trained professional as CAN-MDS operators	Translation (and secondary data-see also working file 9)	Secondary data [working file 9] Name, Profession, Agency, Address, Telephone, email (personal)	
transgender	translation+adaptation (if needed)	add note that this is applicable or not in your country	
travel and tourism sexual exploitation	translation+reference to respective law (if applicable)		
twisting ears	translation		
tying up or tying to something	translation		
type of family	translation		
unborn	translation+additional information (if applicable) and reference to respective law (if applicable)	describe provisions for rights of unborns and/or abuse of unborns (if applicable)	
unjustified delay to seek medical care	translation		
unstable custody arrangements	translation+reference to respective law (if applicable)		

term	Suggested adaptation (translation/ modification/ addition of information and/or reference) Supporting working files and reports (where applicable)	modification of definition (if needed) and/or additional national information (if applicable) and/or secondary data (where applicable)
use the child in commercial sexual exploitation	translation+reference to respective law (if applicable)	
uvulectomy	translation	
vaccination related neglect	translation (see also working file 3)	
verbal assaulting	translation	
verbal bullying	translation	
violence in the guise of treatment	translation	
violence	translation	
violent acts against self	translation	
violent acts known also as harmful practices	translation+reference to respective law (if applicable)	
violent acts related to child's exploitation	translation+reference to respective law (if applicable)	
violent acts related to child's exposure	translation+reference to respective law (if applicable)	
violent acts with or without obvious consequences	translation	
violent and degrading initiation rites, "hazing"	translation+additional information (if applicable)	if country specific types of hazing are applicable
virginity testing	translation	
vision care neglect	translation+additional information (if applicable)	if specific vision care procedures are provisioned
voyeurism	translation	
welfare related professions	translation	
withholding essential medical care	translation+adaptation (if needed)	add note if, for example, it is permitted to caregivers to not provide specific health care due to religious or cultural reasons

Working Files

Working file 1: Instructions for creating Agencies' IDs

Working file 2: Instructions for creating Operators' IDs

Working file 3: Mandatory and Recommended vaccinations

Working file 4: Education related information

Working file 5: National Ombudsman

Working file 6: Secondary Data for CAN-MDS Participating Agencies

Working file 7: Secondary Data for Child (alleged) Victim

Working file 8: Secondary Data for National CAN-MDS Administator

Working file 9: Secondary Data for CAN-MDS Trained Professionals

Working file 10: Secondary Data for Mandatory reporting of CAN

Working file 11: Secondary Data for CAN-MDS Operators

Working file 12: Focus Group Protocol & Discussion Guide

Working file 13: Correspondance of CAN-MDS codes/subcodes with existing systems (DSM-V, ICD-10 and ICD-9; ICECI?)

Working file 1: Instructions for creating Agencies' IDs

[see also Working file 6]

INSTRUCTIONS FOR GENERATING AGENCIES' IDs [DE R1]

	A GENERATING AGENCIES IDS [DE_KI]			
ID format	Instructions			
	10-digit CODE formulated as follows:			
	+ Country abbreviation (2 letters) ³ (see also Annex IA)			
	+ Region abbreviation (2 letters) ⁴ (see also Annex IB)*			
	+ Organization/Service Type (3 letters) (see Annex IC)			
	+ Organization/Service Number (3 digits) (see also Annex ID)			
	* All countries have a 2-digit abbreviation but Belgium (3-digit abbreviation and therefore			
	code should be 11-digit)			
Prerequisites	A detailed mapping of all related agencies on the basis of your responses in the STEP A of the tool for the definition of eligibility criteria for CAN-MDS operators, including basic information on the type of service (such as health, mental health, social welfare etc.).			
	TIP: You can also use the respective information from your country profile report (if you think that the information in Chapter 4 "Brief overview of child maltreatment prevention & child protection" is sufficient) Secondary Agencies' contact details			
Secondary				
information needed:	 a. necessarily email to be used in V18 for auto-notifications based on the referral(s) made by the Operator's Agency 			
	b. further contact details (telephone number(s), address) for the Annex I of the national version			
Expected	Two lists are expected to be developed:			
outcomes:	1 st list will include all eligible agencies to be involved in the system along with contact details.			
	This list will be Annexed in the Guide for Operator			
	2 nd list will include all eligible agencies with their codes. Only System's Administrator will have			
	access in this list including paired "Agency-Code".			
NOTE	Agencies' IDs will also be used for the formulation of Operator's ID working in the respective agencies (as 1 st part).			

³ **ISO 3166-1.** *Codes for the representation of names of countries and their subdivisions* (part of the ISO 3166 standard published by the International Organization for Standardization)

⁴ **ISO 3166-2**. *Country subdivision code* (part of the ISO 3166 standard published by the International Organization for Standardization

^{*} To collect data on which services receive/detect CAN referrals and are involved in administration of cases at both, local and national level. On the basis of the data that will be collected via this variable, the established network of agencies administrating CAN cases and working with maltreated children and their families will be outlined. This information would also be useful for future improvement of the criteria for eligible fields/ services to be included or excluded in the CAN-MDS as data-sources.

Moreover, knowing the identity of services involved in case administration could be useful for policy makers as a baseline for assessment of services' needs (at local and national level) for prioritizning the allocation of resources mainly for secondary and tertiary prevention of child maltreatment; furthermore, by profiling the route of case administration and the practices applied, they can strengthen potential synergies and work towards the adoption of agreements or protocols to facilitate agencies' cooperation and subsequently cases' administration.

ANNEX

A. COUNTRY CODES (ISO 3166-1)⁵

Alpha-2 code – a two-letter code that represents a country name, recommended as the general purpose code Country abbreviation (2 letters)⁶

BE Belgium BG = Bulgaria CH Switzerland DE Germany FR = France GR = Greece IT Italy = Romania RO

B. SUBDIVISION CODES (ISO 3166-2)⁷

Subdivision codes – code that represents the name of a principal subdivision (e.g province or state) of countries coded in ISO 3166-1. This code is based on the two-letter code element from ISO 3166-1 followed by a separator and up to three alphanumeric characters. The characters after the separator cannot be used on their own to denote a subdivision, they must be preceded by the alpha-2 country code.

The codes denoting the subdivision are usually obtained from national sources and stem from coding systems already in place in the country.

C. Organization/Service Type (3-letter)

As no standards are available for Organization/Service Type, the following initialisms will be used for the formulation of Agency's ID

Organization/Service Type	3-letter initialis m	Major Groups of Occupations belonging to each field (ISCO, 2008: broad classification) ¹⁶
Child Protection Services	CPS	39-0000 Personal Care and Service Occupations 21-0000 Community and Social Service Occupations
Social Welfare Services	SWS	21-0000 Community and Social Service Occupations 39-0000 Personal Care and Service Occupations
Mental Health Services	MHS	19-0000 Life, Physical, and Social Science Occupations
Primary Health Care Services	PHC	29-0000 Healthcare Practitioners & Technical
Secondary Health Care Services	SHC	Occupations
Tertiary Health Care Services	тнс	31-0000 Healthcare Support Occupations 11-0000 Management Occupations
Judicial Services	JUD	23-0000 Legal Occupations 43-0000 Office and Administrative Support Occupations
Police	POL	
Other Law Enforcement-related Services	LES	33-0000 Protective Service Occupations
Preschool Educational Facilities	PEF	25-0000 Education, Training, and Library Occupations
Primary Educational Services	PES	11-0000 Management Occupations
Secondary Educational Services	SES	43-0000 Office and Administrative Support
Vocational Educational Services	VES	Occupations
Already existing registries/CAN monitoring mechanisms	RSS	15-0000 Computer and Mathematical Occupations
Research Organizations/ Institutions/ Universities	ROI	19-0000 Life, Physical, and Social Science Occupations 15-0000 Computer and Mathematical Occupations
Independent Authorities (such as Child Ombudsman)	IAU	11-0000 Management Occupations
Accredited NGOs	NGO	NA (could be all the broad categories)
Community Organizations	СОМ	NA (could be all the broad categories)
Other Related Services	ORS	11-0000 Management Occupations

^{*}Professionals codes will be based on the detailed classification of occupations ISCO-2008 published by ILO, 2007.

D. Organization/Service Number (3 digits)

Numerical ID per type of Organization/Service per geographical subdivision

¹⁶ Bureau of Labor Statistics (2010). 2010 Standard Occupational Classification (final structure for the 2010 SOC). On behalf of the Standard Occupational Classification Policy Committee (SOCPC) (available at: http://www.bls.gov/oes/current/oes-stru.htm#11-0000).

Working file 2: Instructions for creating Operators' IDs

[see also Working file 11]

INSTRUCTIONS FOR GENERATING OPERATORS' IDs [DE_R2]

ID format	Instructions (on the basis of ILO 2007)							
	18-digit* CODE formulated as follows:							
	+ 10-digit Agency's ID (V1)							
	+ Operators Professional Specialty: 4-digit (ILO, 2007) ¹⁷							
	+ 1 digit for the Access level (See Annex IIB)							
	+ 3-digit number indicating individual professionals working in the same Agency.							
	*but Belgium which should have 19-digit							
Prerequisites:	In order for a Professional to become Operator of CAN-MDS systems, s/he should:							
	a. to fulfill the pre-defined eligibility criteria, namely to belong in one of the eligible groups of professionals ¹⁸ (see Annex IIC)							
	b. to previously successfully attend the workshop for "CAN-MDS"							
	TIP: You can also use the respective information from your country profile report (if you think							
	that the information in Chapter 4 "Brief overview of child maltreatment prevention & child							
	protection" is sufficient)							
Secondary	Operator's contact details							
information	a. <i>necessarily</i> email and telephone number to be used for further communication with							
needed:	the Administrator							
	 further contact details (such as address) will be already available in the Annex I of the national version 							
Expected	A list is expected to be developed that will include all Operators to be involved in the system							
outcome:	along with their codes and contact details. Only System's Administrator will have this list.							
For the next	A list including all national Core-Group Members (20-25 persons) as well as staff of your agency							
period:	involved in the project.							
NOTE	Given that Operator's ID includes the Agency's ID, information on where the Operator works							
	(geographically, specific agency, type of agency and agency's contact details) will be readily available.

^{*} To collect data on the professional backround of "professionals-operators" who are involved in receiving referrals/ detect cases, recording of cases and involved in case administration in order to map their "responsibilities". These data could be useful for agencies' administrators and policy makers for assessing the educational needs of the different groups of professionals who are mainly involved in the administration of CAN cases. Moreover, this information would also be useful for future improvement of the eligibility criteria for potential CAN-MDS operators.

•

ANNEX

A. Agency's ID (See working file 1)

B. ISCO-08: International Standards for Classificiation of Occupations (ILO, 2007)

Available at: http://www.ilo.org/public/english/bureau/stat/isco/docs/gdstruct08.doc (word format) and at: http://www.ilo.org/public/english/bureau/stat/isco/docs/gdstruct08.xls (excel format).

"The Tripartite Meeting of Experts on Labour Statistics on Updating the International Standard Classification of Occupations (ISCO) [,...] Adopts, this sixth day of December 2007, the following resolution

- 1. The occupational classification system of major, sub-major, minor and unit groups shown in the Annex to this resolution is endorsed by the Meeting of Experts in Labour Statistics and is designated the International Standard Classification of Occupations, 2008 (ISCO-08).
- 2. ISCO classifies jobs. A Job is defined for the purposes of ISCO-08 as a set of tasks and duties performed, or meant to be performed, by one person, including for an employer or in self employment.
- 3. An occupation is defined as a set of jobs whose main tasks and duties are characterised by a high degree of similarity. A person may be associated with an occupation through the main job currently held, a second job or a job previously held.
- 4. Jobs are classified by occupation with respect to the type of work performed, or to be performed. The basic criteria used to define the system of major, sub-major, minor and unit groups are the "skill level" and "skill specialization" required to competently perform the tasks and duties of the occupations.
- 5. In collecting and processing statistics classified by occupation (e.g. for use in fields such as labour market analysis, educational planning, human resource planning, occupational health and safety analysis, wages analysis, etc.), each country should endeavour to compile data that can be converted to the ISCO-08 system, to facilitate the international use and comparison of occupational information."¹⁹

ISCED 2011: International Standard Classification of Education

ISCED 0: Early Childhood Education Programmes at this level are typically designed with a holistic approach to support children's early cognitive, physical, social and emotional development and introduce young children to organised instruction outside of the family context. ISCED level 0 refers to early childhood programmes that have an intentional education component.

ISCED 1: Primary education Programmes at this level are typically designed to provide students with fundamental skills in reading, writing and mathematics (i.e. literacy and numeracy) and establish a solid foundation for learning and understanding core areas of knowledge, personal and social development, in preparation for lower secondary education. Age is typically the only entry requirement at this level. The customary or legal age of entry is usually not below 5 years old nor above 7 years old. This level typically lasts six years, although its duration can range between four and seven years.

ISCED 2: Lower secondary education Programmes at this level are typically designed to build on the learning outcomes from ISCED level 1. Students enter ISCED level 2 typically between ages 10 and 13 (age 12 being the most common).

ISCED 3: Upper secondary education Programmes at this level are typically designed to complete secondary education in preparation for tertiary education or provide skills relevant to employment, or both. Pupils enter this level typically between ages 14 and 16.

ISCED 4: Post-secondary non-tertiary education Post-secondary non-tertiary education provides learning experiences building on secondary education, preparing for labour market entry as well as tertiary education. Programmes at ISCED level 4, or postsecondary non-tertiary education, are typically designed to provide individuals who completed ISCED level 3 with non-tertiary qualifications required for progression to tertiary education or for employment when their ISCED level 3 qualifications do not grant such access. The completion of an ISCED level 3 programme is required to enter ISCED level 4 programmes.

ISCED 5: Short-cycle tertiary education Programmes at this level are often designed to provide participants with professional knowledge, skills and competencies. Typically, they are practically based, occupationally-specific and prepare students to enter the labour market. However, these programmes may also provide a pathway to other tertiary education programmes. Entry into ISCED level 5 programmes requires the successful completion of ISCED level 3 or 4 with access to tertiary education.

ISCED 6: Bachelors' or equivalent level Programmes at this level, are often designed to provide participants with intermediate academic and/or professional knowledge, skills and competencies, leading to a first degree or equivalent qualification. Entry into these programmes normally requires the successful completion of an ISCED level 3 or 4 programme with access to tertiary education. Entry may depend on subject choice and/or grades achieved at ISCED levels 3 and/or 4. Additionally, it may be

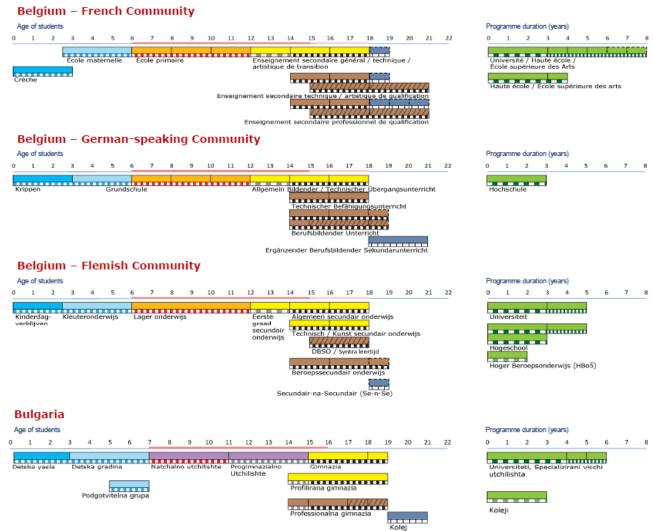

required to take and succeed in entry examinations. Entry or transfer into ISCED level 6 is also sometimes possible after the successful completion of ISCED level 5.

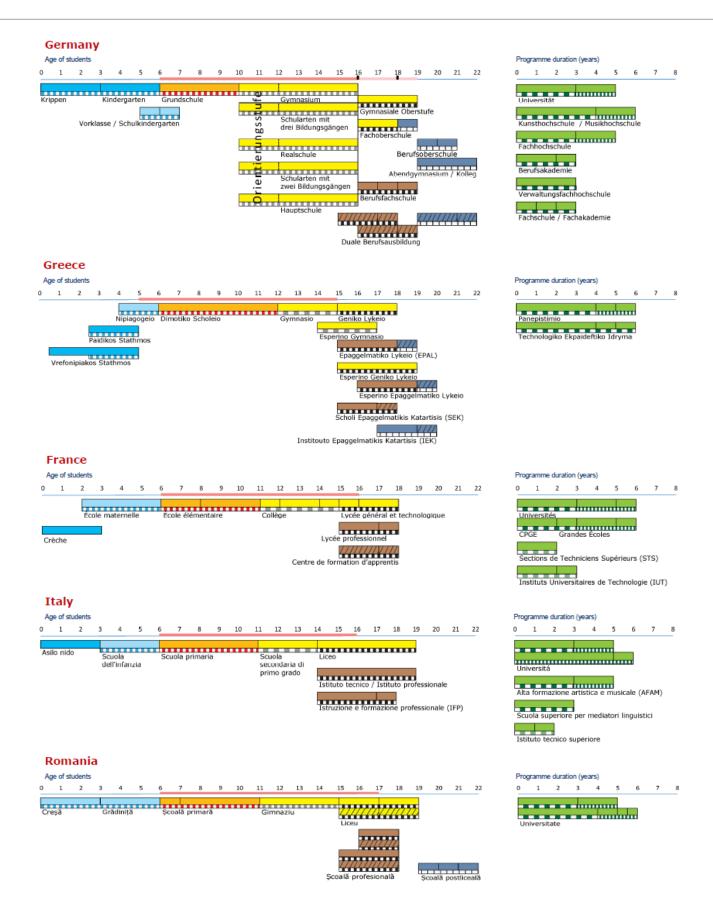

ISCED 7: Master's or equivalent level Programmes at this level, are often designed to provide participants with advanced academic and/or professional knowledge, skills and competencies, leading to a second degree or equivalent qualification. Typically, programmes at this level are theoretically-based but may include practical components and are informed by state of the art research and/or best professional practice. They are traditionally offered by universities and other tertiary educational institutions. Entry into ISCED level 7 programmes preparing for a second or further degree normally requires the successful completion of an ISCED level 6 or 7 programme. In the case of long programmes that prepare for a first degree equivalent to a Master's degree, entry requires the successful completion of an ISCED level 3 or 4 programme with access to tertiary education. Entry into such programmes may depend on subject choice and/or grades achieved at ISCED levels 3 and/or 4. Additionally, it may be required to take and succeed in entry examinations. For the full details on each ISCED level, please consult: UNESCO, Institute for Statistics, 2012. International Standard Classification of Education. ISCED 2011.

Source: Eurydice.

Country specific notes

Bulgaria: Compulsory ECEC: 5-year-olds – 20 hours; 6-year-olds – 24 hours.

Germany: From August 2013, the legal entitlement to subsidised ECEC is from age 1. Romania: From September 2014, all 5-year-olds will have a legal entitlement to ECEC.

Switzerland: In 19 cantons (out of 26) attendance of pre-primary education is compulsory. Depending on the canton, compulsory pre-primary provision lasts one or two years. In those cantons where pre-primary education is not compulsory, children from the age of 4 or 5 are legally entitled to a publicly subsidised place.

Explanatory note: Legal entitlement or compulsory ECEC that applies only to certain categories of learners (e.g. disadvantaged learners) is not considered [Legal entitlement to ECEC refers to a statutory duty on ECEC providers to secure publicly subsidised ECEC provision for all children living in a catchment area whose parents, regardless of their employment, socioeconomic or family status, require a place for their child]

ECEC Organization

Belgium – French Community

Children from 3 months to 3 years may attend different types of centre-based settings (milieu d'accueil collectif), including crèche, prégardiennat, maison communale d'accueil de l'enfance (MCAE) or maison d'enfants. In addition, there is also a system of regulated home-based care, which is delivered by child-minders (accueillantes d'enfants) who either work independently (accueillantes d'enfants

autonomes) or are affiliated to specific child-minding organisations (accueillantes d'enfants conventionnées). Home-based and centre-based care for the youngest children falls under the responsibility of the organisation ONE (Office de la Naissance et de l'Enfance), which is under the authority of the Minister of Childhood. From age 21/2, children are legally entitled to free early childhood education in the école maternelle. This area falls under the responsibility of the Minister of Education. Primary education starts at age 6.

Belgium – German speaking Community

Up to the age of 3, children mostly attend regulated home-based care, which is provided by child-minders (Tagesmütter) who either work independently (Selbstständige Tagesmütter) or are affiliated to a specific child-minding Organisation (Tagesmütterdienst - TMD). There is also a centre-based setting known as Kinderkrippe. ECEC for the youngest children falls under the responsibility of the Ministry of Employment, Health and Social Affairs. From age 3, children are legally entitled to free early childhood education in Kindergarten. This area falls under the responsibility of the Ministry of Education. Primary education starts at age 6.

Belgium – Flemish Community

Early childhood education and care is divided into two main areas: formal child care for children from birth to 3 years that can be home-based (Onthaalouders) or centre-based (Kinderdagverblijven), and pre-primary education (Kleuteronderwijs) for children from age 2½ The first area falls under the responsibility of the Flemish Minister of Welfare, Health and Family and is administered by the agency Kind en Gezin. Preprimary education for children over 2½ falls under the responsibility of the Flemish Ministry of Education and Training. From age 2½, children are legally entitled to free pre-primary education. Primary education starts at age 6.

Reforms: From 1 April 2014, a new decree on childcare (0 to 3) will be implemented. This will be combined with a whole new regulation. Accreditation and evaluation procedures will be the same for public and private settings in order to strive for more uniform quality in every setting. A new and more uniform subsidy system linking subsidies with specific responsibilities will be introduced.

Bulgaria

Children aged between 3 months and 3 years may attend centre-based settings known as detska yasla. From age 3, early childhood education is available in detska gradina, where the Ministry of Education and Science is responsible for the education process. The last two years of pre-primary education (i.e. between the ages 5 and 7) are compulsory and children may take them either in detska gradina or in primary school (uchiliste). In addition to the separate settings for younger and older children, there are also unitary settings (obedineni detski zavedenia) intended for children aged between 10 months and 7 years. The provision in these settings is structured according to the above phases (i.e. up to 3 years, between 3 and 5 years, and between 5 and 7 years of age). Primary education starts at age 7.

France

The ECEC system includes various types of provision, especially for the youngest children. Provision for the under-3s consists of centre-based crèches and other structures collectives (group settings) (e.g. jardins d'éveil, classes passerelles, etc.), which are complemented by regulated home-based provision provided by assistant(e)s maternel(le)s agréé(e)s. ECEC policies and subsidies aim to provide choice and flexibility for parents to use more than one type of provision at the same time. The statistics provided show only the main forms of provision. Home-based ECEC is often used to complement centre-based ECEC. From age 3, all children are enrolled in pre-primary schools (écoles maternelles) which are coordinated by the Ministry of Education. Most children attend free public schools in their catchment area, while less than a third enrol in fee-paying (although subsidised) private schools. Primary education starts at age 6.

Reforms: As of 2013/14, children from the age of 2 may be enrolled in pre-primary schools (écoles maternelles). This measure is being implemented progressively with priority given to children from socially disadvantaged areas. The educational staff-pupil ratio for 2 year-old children is lower than for older children.

Germany

The ECEC system is highly decentralised and comprises several different types of setting. Childcare centres (Tageseinrichtung) provide for either younger or older children separately (in Krippen and Kindergarten, respectively) or operate as one setting for the entire ECEC phase. In addition to centre-based ECEC provision, there is also a system of regulated and publicly subsidised home-based care (Tagespflege), which mainly caters for the youngest children (between 0 and 3), but may also deliver parttime provision for older children. Prior to the beginning of primary education, some Länder provide pre-school education (Vorschuleinrichtung). However, this provision only covers a very small proportion of children and is therefore not represented in the diagram. At the federal/national level, the Federal Ministry of Family Affairs, Senior Citizens, Women and Youth is responsible for ECEC in both homebased and centre-base provision. At Länder level, it can be either the ministry of family affairs or the ministry of education. Until 2013, parents were legally entitled to a publicly subsidised childcare place when their child reached age 3. Primary education starts at age 6.

Reforms: From August 2013, the starting age for the legal entitlement to subsidised ECEC has been lowered to 1 year.

Greece

From 6 months to 5 years, children can attend infant centres (vrefonipiakos stathmos). Between the ages of $2\frac{1}{2}$ and 5, parents can opt for a place in a child centre (paidikos stathmos). Both types of centres must set up their rules of operation in compliance with the regulations specified in the ministerial decision currently in force. These rules of operation must then be approved by the relevant municipal council. From age 4, children can attend a pre-primary school (nipiagogeio), which is compulsory for those aged between 5 and 6. This type of provision falls under the responsibility of the Ministry of Education and Religious Affairs. Primary education starts at age 6.

Italy

The system of early childhood education and care includes settings for children between 0 and 3 years known as nido d'infanzia and settings for children between 3 and 6 years (scuola dell'infanzia). The latter settings fall under the responsibility of the Ministry of Education, while the provision for young children is highly decentralised and managed at local level by Communes according to their own regulations. Alongside centre-based provision, home based provision (asilo familiare) is becoming more and more common. However, it is not regulated centrally and is not available across the whole country. In addition to the settings represented in the diagram, there are also other types of provision for young children, including 'spring sections (sezioni primavera) aimed at children aged from 2 to 3 years. This new service has been introduced to meet the demand of families. Primary education starts at age 6.

Romania

Up to the age of 3, children are provided early childhood care in centre-based settings known as creşa. From age 3 years (sometimes even from age 2) up to 6 years, children may attend a centre based gradinita. The Ministry of National Education is entirely responsible for the ECEC of children over 3 years of age in gradinita. However, it shares responsibility with the Ministry of Health and the Ministry of Labour, Family, Social Protection and Elderly for children under 3 years. Primary education starts at age 6. However, prior to entry into force of the Law of National Education 1/2011, parents could choose where to enrol their children: at the age of 6, a child could be either in kindergarten or at school, in grade 1.

Reforms: From 2014 September, children aged 5 to 6 will have a legal right to a place in a gradinita.

Switzerland

Due to the federal structure the ECEC system in Switzerland is highly decentralized and differs across 26 cantons. There are, however, some characteristics common to the whole system. Centre-based ECEC (in Kindertagesstätten or Krippen/Structures d'accueil collectif de jour or crèches/Strutture di custodia collettiva diurne) is available for children between 3.5 months up to age 4 (until the start of compulsory education). In some cantons, it is also available for children up to age 5 or 6 for additional hours of provision. There is also home-based ECEC (Tagesfamilie/Famille de jour/ Famiglia diurna) that usually caters for children between 3.5 months up to the start of compulsory education, but they are also open to older children. The majority of settings for the youngest children fall under the responsibility of the cantonal ministries of social affairs, while in a few cantons they are under the responsibility of the cantonal ministry of education. From the beginning of compulsory education, which in most cantons starts at age 4 (in a few at age 5 or 6), children must attend pre-primary institutions (Kindergärten/ Ecoles enfantines/Scuole dell'infanzia), which fall under the responsibility of cantonal ministers of education. Primary education starts at age 6. Complementing compulsory education, in most cantons fee-paying out of school hours provision (Schulergänzende Betreuung/Accueil parascolaire/ Strutture di custodia parascolastiche) including midday meals, is available.

Reforms: 15 out of 26 cantons have signed the 'Intercantonal Agreement on the Harmonisation of Compulsory Education' (HarmoS Agreement), which aims to ensure harmonised regulation of certain benchmarks in education. In ECEC this implies introducing compulsory pre-school from age 4 and fee paying outof-school hours' provision to meet local needs by the beginning of the 2015/16 school year.

Working file 12: Focus Group Protocol & Discussion Guide

Suggested Methodology for cultural adaptation of CAN-MDS Toolkit

Focus Group Discussions

AIM: to assess content validity, quality and feasibility of each individual element in CAN-MDS

- 2 groups * 10 professionals / country
 - o Professionals should represent all eligible professional groups and sectors

Suggestion: it would be easier to recruit the same professionals who will be invited in the Core groups and in the national workshops

Planning the Focus Groups

- Preparing Invitation letters*
- Provision of the material in advance (in order for the FGs' members to have the time to review them)
- Define the venue & the dates

Focus group results

- Reporting
 - o Revising the national version of the Toolkit according to FG results

* Invitation for participation to the Focus Groups Discussions

- Invitation letter including
 - a brief description of the objectives of discussion group and of the procedure including their preparation (review of CAN-MDS Toolkit)
 - Upon the confirmation of their participation, copies of the Toolkit will be sent to each of the
 professionals in advance, with the instruction to read the material and keep notes for any point they
 would like to discuss.

Overview of FGs

	Suggested Process & Organization
Method	Group session
Group size	10 participants per session + 2 moderators
Session duration	120 min
Time	Before December 2014
Place	TBD per country
Participants	Professionals eligible to participate in the Core groups of Operators
Recruitment of participants	Written invitations and further communication via phone where needed
Participants preparation	Review in advance the CAN-MDS Toolkit
Eligible participants	According to the eligibility criteria (see Deliverable)
Number of Groups & participants	2 groups * 10 participants /country * 7 countries
Moderator(s)	Project's local coordinators and researchers per group Moderator: coordinate the discussion Co-moderator: keeping the minutes of the discussion
Moderators' discussion guide	Will include the issues to be discussed, instructions for moderating the discussion, time to be devoted per topic
Other material	Invitation letters and copies of the CAN-MDS Toolkit
Data to be collected	Qualitative
Data collection	Written minutes/ other?
Analysis of data	Descriptive analysis of repeated issues, comments and suggestions Presentation of selected quotations (words, sentences, expressions)
Reporting	Brief description of aim and method of FG Presentation of results and references for any specific part of the Toolkit suggested to be modified A list of the modifications made in the national version

FOCUS GROUP DISCUSSION CAN-MDS Toolkit [120 MIN PER GROUP]

Opening of the Discussion

TOPIC 1: CONTENT OF the Toolkit

[10 min]

As the participants get prepared for the discussion, the moderator asks the following questions:

- 1. Do you think that the way the content is presented meet the objectives of the CAN-MDS?
- 2. As for the content of the Toolkit, is there any point that you don't agree with?

TOPIC 2: STRUCTURE & FUNCTIONALITY OF Toolkit

[10 min]

- 1. In general, how would you evaluate the structure of the Toolkit?
- 2. Do you think that the Toolkit would be useful for you as an operator of a future CAN-MDS System?
- 3. Is there anything that you don't understand regarding the instructions for the use of the Toolkit?

TOPIC 3: CAN-MDS variables

[75 min]

CLARITY & PRECISION

Instruction for the moderator: Please ask participants if there is any data element that it is not understandable and that it requires changes/modifications.

→ TIP: Use a table with the 18 data elements of the final CAN-MDS in order to record how many professionals indicate each individual variable

DISCUSSION PER Variable

For each Variable, moderator will ask professionals the following questions:

- 1. In your opinion, is the data element related to the objectives of the CAN-MDS?
- 2. Are the instructions for the completion clear?
- 3. Do you think that you can collect data for this data element from the persons you work with?
- 4. Is there any particular reason you would choose not to ask for this data element?
- 5. Do you think that reporters of CAN cases are willing to provide information for this data element?
- 6. Do you think that, in general, the information needed is available to the reporters?

TOPIC 4: Closing

[15 min]

- 1. In general, what's your opinion regarding the idea of developing a system, such as the CAN-MDS?
- 2. Do you think that your participation as a CAN-MDS operator is feasible?

Management and processing of results: From the focus groups' discussion a bulk of information is expected to result regarding participants' opinions and comments.

To this end, especially if the discussion has not been recorded by electronic means (video/tape), it is suggested that immediately after ending each group, the moderators to meet and consolidate what they record (such as excerpts) and summarize the main points of the discussion, potential patterns observed in the answers, by identifying the topics on which there was agreement or disagreement. They should also record all alternative proposals for improvement.

The answers (qualitative data) and words- or key-phrases should be recorded and grouped into categories under general headings corresponding to the topics included in the respective discussion guide for each group. Once completing the recording of answers, the different views and attitudes and the extent to which group members agreed (they actually had the same opinion) can then be separated. Combining the common responses will result in the general pattern of responses, which will determine whether the material requires further modifications or not.

To facilitate and systematize this process, a template can be used as in the example below, in which the Discussion Guide's topics are recorded in the first column and participants' answers can be recorded in the second column.

Keeping notes from FGs. Template for the systematization of answers from a focus group with professionals
